

“The Buildings & Grounds Department is responsible for maintaining seven Town buildings and facilities, nineteen park areas, twelve park districts, three Town pools and other public areas associated with the Town or parkland, such as the Vischer Ferry Nature Preserve. The youth who come to us from the Summer Youth Employment Program are an essential part of helping us to keep those public areas clear and safe for the community to use. Shane and Andrew were a great team last year! They worked well together, they were dependable and responsible and they worked hard! They spent their summer in the hot sun clearing branches and debris from our town trails so that members of the community can walk, run or bike on them safely. They are good boys; we were lucky to have them and would welcome them back.”
