

Clifton Park Trunk Sewer Rehabilitation Project

The information provided below is to update residents of Northcrest Drive, Bear Brook Drive, Woodbine Drive and surrounding areas. Most of the emergency repair work has been completed and design is underway.

Weston & Sampson, PE, LS, LA, PC is the engineering firm that has been hired to evaluate the existing pipe and design a repair. The engineer is currently in the Preliminary Design Phase.

Project Schedule

- Preliminary & Final DesignApril 1 to September 30, 2018
- Bid Phase (4 weeks)October 2018
- Award & Execute Contractor Agreement.....November 2018
- Construction Period (3 months)December to February 2019

The schedule is an approximate look ahead to give an idea to the residents when to expect disturbance. The Construction Period will be weather and/or phasing dependent. The project approach is to choose non-invasive technologies that will minimize disturbance.

While progress sometimes comes with inconveniences, we appreciate your patience and cooperation. Again, Saratoga County Sewer District #1 thanks all of the impacted residents for your understanding during this endeavor. Please check back for updates on upcoming public meetings regarding the project.
