PRODUCTS TO HELP COMBAT CORONAVIRUS

iWave

Air Purifiers

The Center for Disease and Control (CDC) is responding to an outbreak of respiratory disease caused by a novel (new) coronavirus that was first detected in China and which has now been detected in 60 locations internationally, including in the United States. The disease it causes has been named "coronavirus disease 2019" ("COVID-19").

At this time COVID-19 virus has not been made available for testing. However, the iWave family of products have been proven through independent lab testing to significantly reduce a wide variety of pathogens and viruses similar to coronavirus in the breathing zone and on hard non-porous surfaces. It is important to note that we make no medical claims.

康计®

Non-contact Infrared Thermometer

Model: GQ-129

- **Fast and Accurate**
1s temperature measurement, accurate to ± 0.3 °C.
- **Contactless temperature measurement.**
Measuring distance is 3-5cm, convenient and practical.
- **This machine has multiple purpose**
5-80°C, It can measure the temperature of human body and objects.
- **Backlight with 3 different color.**
Green(Normal), Orange(Low fever), Red(High fever)

DECLARATION OF CONFORMITY

Product Designation: COVID-19 IgM-IgG Rapid Test

Model #s: 51-002-20

We herewith declare that the products listed above are in compliance with the requirements set out in the Council Directive on the harmonization of the Laws of the Member States concerning In-Vitro-Diagnostic Directive 98/79/EC. The Declaration of Conformity is issued under the sole responsibility of the manufacturer.

Conformity Assessment Procedure: Annex III (IVD 98/79/EC)

Classification of the product:

General; Not a referred product in Annex II, List A and List B
EDMA Code: 15.04.80.90.00 - Other Virology (Infect. immunology,
Other Viral Antigen/Antibody Detection

Applied Harmonized Standards:

EN 13640:2002	Stability Testing of in Vitro Diagnostic Reagents
EN ISO 14971:2019	Medical devices - Application of risk management
EN ISO 15223-1:2016	Medical devices - Symbols to be used with medical device labels, labelling, and information to be supplied - Part 1: General Requirements
EN ISO 18113-2:2011	In vitro diagnostic medical devices - Information supplied by the manufacturer (labelling) - Part 2: In vitro diagnostic reagents for professional use

Medical Dome

made in California, USA

This dome can be placed over COVID 19 patients while medical professionals administer to them.

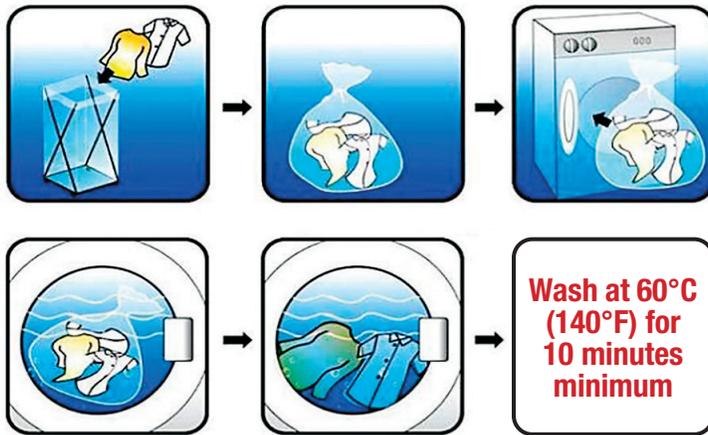

This dome has been sold to hospitals on the west coast such as LA's Cedars Sinai.

Water Soluble Bags from:

Our water soluble bag fully dissolves into harmless ingredients. It's ideal for healthcare situations, both hospitals and nursing homes, where contact needs minimized between staff and infected laundry. With our water soluble bag, you can be assured that contaminated clothing or linen, whether from blood borne pathogens or even pests such as bed bugs, are contained. There are many uses for the water soluble bag, some of which include:

- **Hospitals/Clinics/Nursing Homes**
 - ◆ Containment for clothing or linens
- **Hotels/Motels**
 - ◆ Containment for linens – bedding and/or curtains
- **Correctional facilities/Prisons**
 - ◆ Containment for clothing or linens
- **Industrial Settings**
 - ◆ Mixing dyes – textile
 - ◆ Mixing pigments – concrete or cement

HOSPITAL ISOLATION BAGS

**NOW ON
CORELESS ROLLS!**

AVET LLC offers color coded, printed bags for Infectious Waste, Infectious Linen and Non-contagious Linen management. Our printed Stock Isolation Bags are imprinted with English and Spanish to help ensure complete understanding for safety and proper use.

Complete sanitary management is available in both Linear Low and High Density. They are available in a full range of sizes and strengths as well as featuring the multi-layered star seal.

Our Linear Low Isolation bags start with top quality resins and are carefully constructed to provide greater film strength. This added film strength yields a bag with superior puncture and tear resistance.

The High Density Isolation bags are environmentally responsible as well as cost efficient. The unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins reduces the tendency in most high density can liners for tears or punctures to "zipper".

Red Bags: Infectious Waste

Yellow Bags: Infectious Linen

Blue Non-contagious Linen bags are unprinted

- Maximum film strength for tough applications
- Puncture and tear resistant
- Leak-resistant star seal
- Ideal for hospitals, doctors' offices, dental clinics and nursing homes
- Bi-Lingual imprint in English & Spanish with the Universal Biohazard symbol
- Designed for Infectious Waste, Infectious Linen and Non-contagious Linen management
- NOW AVAILABLE ON CORELESS ROLLS
