

UPDATE: COVID-19 Information for Saratoga County July 10, 2020

- Confirmed cases of COVID-19: 596
- Deaths: 17
- Recovered cases: 534
- Active cases: 46
- Hospitalizations: 4
- Total tested: 32,771

Low-risk exposure in Clifton Park

The Saratoga County Public Health Department and its team of contact tracers have determined that there was a low-risk exposure last week in Clifton Park at the Delmonico's Italian Steakhouse. The low-risk exposure took place on Wednesday, July 1 from 3:00 p.m. – 9:00 p.m. and on Friday, July 3 from 2:00 p.m. – 8:30 p.m.

While the employee who tested positive was wearing a mask at all times, anyone who visited the restaurant on those dates should self-monitor for signs and symptoms of COVID-19 and get a diagnostic test at any of the test sites listed [here](#).

Saratoga County Public Health Response to Governor's Travel Advisory

All people who travel to Saratoga County from the running list of states that have COVID-19 restrictions need to self-quarantine for 14 days upon arrival to our county. Contact Saratoga County Public Health upon entering the county in order to receive proper procedures for self-quarantine. The complete guidance and list of states can be found [here](#).

It is extremely important that you monitor yourself for symptoms every day and contact a doctor and our local health department if symptoms appear.

Hotels, motels, campgrounds and other lodging should send Public Health referral information so we can contact, assess, provide education and actively monitor these visitors.

The Saratoga County Public Health Department has linked travel information and guidance — both within the U.S. and internationally — on its COVID-19 [website](#).
