

APPENDIX D: Mitigation Strategies

This appendix provides a comprehensive list of the mitigation actions from the previous hazard mitigation plan that were considered by Saratoga County and participating jurisdictions. For this plan update, the county and jurisdictions reviewed these actions and reported on the project status and the progress on implementation. Information, where provided, has been captured in this appendix.

Some jurisdictions did not report implementation updates on their mitigation actions. The actions were carried forward into the 2019 Mitigation Action Plans in each of the jurisdictional annexes. If additional implementation information is provided at a future date, it will be incorporated into the table below.

Table D-1: Status of Mitigation Actions

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Saratoga County	SC-1	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Ongoing/In progress	1. County Sewer Pumps Raised. 2. Back-up power established at Public Health building. 3. IT has relocated computer systems to centralized location.	Yes	Saratoga County will continue to support local jurisdictions with the identification of structures located in hazard-prone areas and assist with the evaluation of mitigation options, including retrofitting. The County will also assist local jurisdictions with developing applications for funding to implement viable and cost-beneficial retrofit projects.
Saratoga County	SC-2	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Ongoing/In progress	Saratoga County has worked with FEMA to identify repetitive loss properties.	Yes	Saratoga County will continue to support local jurisdictions with the identification of structures located in hazard-prone areas and assist with the evaluation of mitigation options, including relocation and retrofitting. The County will also assist local jurisdictions with developing applications for funding to implement viable and cost-beneficial relocation projects.

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Saratoga County	SC-3	As appropriate, support participation in incentive-based programs such as CRS.	Not started	As a part of the 2019 Hazard Mitigation Plan update, the County has received new information on this program. We will look to implement in the future.	Yes	The County will educate local jurisdictions of the benefits of participation in the CRS, providing support and resources to help interested jurisdictions begin to participate. The County will coordinate with and leverage available State and FEMA resources to deliver informational and educational sessions to jurisdictions about the CRS program.
Saratoga County	SC-4	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The County supported the implementation and maintenance of the previously plan and led the 2019 HMP update.	Yes	The County will continue to support the implementation, monitoring and maintenance of the plan through annual meetings that engage the participating jurisdictions to review and document progress on their mitigation actions. The County will also support the update of the plan in five years.
Saratoga County	SC-5	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The County continues to promote education and provide support to jurisdictions on enforcing regulatory guidelines for the National Flood Insurance Program.	Yes	The County continues to promote education and provide support to jurisdictions on enforcing regulatory guidelines for the National Flood Insurance Program.
Saratoga County	SC-6	Continue to develop, enhance, and implement existing emergency plans.	Ongoing/In progress	County's Comprehensive Emergency Management Plan (CEMP) is updated yearly. The County has added several new annexes in the last 2 years. Created Tactical Interoperable Communications Plan (TICP).	Yes	The County will continue to update and enhance the CEMP to align with emergency management best practices and changing priorities within the County.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Saratoga County	SC-7	Implement proactive stream/drainage maintenance system to reduce flooding in hazard areas.	Ongoing/In progress	The County shares floodplain mapping with the municipalities to support the maintenance of stream and drainage systems.	Yes	Continue to share floodplain mapping with municipalities and assist with implementing proactive stream/drainage maintenance systems to reduce flooding in hazard areas.
Saratoga County	SC-8	Provide backup power at critical facilities where necessary	Ongoing/In progress	Most County buildings, including the Sheriff's Office and Jail, and all 911 radio communication towers have back up power.	Yes	Conduct assessment of the Counties critical infrastructure for site security, and back-up systems.
Saratoga County	SC-9	Enhance operations of Emergency Operations Center through technological upgrades, including improved communications systems.	Ongoing/In progress	Existing EOC has had several technological upgrades, including the addition of fiber. The County is constantly researching ways to update the EOC.	Yes	Assess Primary EOC as well as backup centers to compare capabilities. Assess usefulness of portable phone systems.
Saratoga County	SC-10	Expand public education on ways to protect property before and during hazard events	Ongoing/In progress	1. Purchase of Reverse 911 system - CodeRED. Municipalities support this program by encouraging residents to register their phone. 2. Regular participation in events such as County Fair, POD drills, and others. 3. We hold 3 Citizen Preparedness classes held each year.	Yes	Develop campaign to improve cell phone enrollment in CodeRED systems. Provide information to County partners for distribution at County events.
Saratoga County	SC-11	Enhance emergency preparedness awareness by active participation in training exercises at both the county and local level	Ongoing/In progress	Saratoga County Offices regularly participates in exercises and drills throughout New York State. The County Office of Emergency Services also coordinates and hosts several trainings and exercises each year.	Yes	Develop campaign to improve cell phone enrollment in CodeRED systems. Provide information to County partners for distribution at County events. Canvas NYS training opportunities open to general public.
Saratoga County	SC-12	Continue to provide tree trimming along roadways	Ongoing/In progress	The county continues to trim trees along roadways to ensure safety.	Yes	Continue rotation as it stands today.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Saratoga County	SC-13	Interagency cooperation with Public Health, DSS, Aging and other agencies to identify vulnerable populations (elderly, homebound, homeless)	Ongoing/In progress	Special Needs registry established. Public Health regularly provides education and outreach to vulnerable populations.	Yes	Work with municipalities to remove people that should no longer be on the list.
Saratoga County	SC-14	Develop a toolbox series on planning topics, model laws, and regulatory tools	Ongoing/In progress	The Office of Emergency Services offers a variety of templates to municipalities for emergency planning and declaring states of emergency.	Yes	OES will continue to offer the templates that it does currently. Saratoga County Real Property Services and Planning Department are also a great resource for information on planning topics, model laws, and regulatory tools.
Saratoga County	SC-15	Assist local municipalities with training opportunities for municipal planning and zoning officials	Ongoing/In progress	The County supports local municipalities with a variety of trainings.	Yes	The County will work on obtaining updated floodplain mapping from FEMA and disseminate the update to stakeholders.
Saratoga County	SC-16	Encourage the incorporation of conservation subdivision principals into subdivision review	Ongoing/In progress	The County has communicated with local jurisdictions on the incorporation of these principals into subdivision review.	Yes	OES and the Saratoga County Planning Department will continue to incorporate conservation subdivision principals into subdivision review.
Saratoga County	SC-17	Assist local municipalities in developing and updating site plan, subdivision, and zoning laws with specific development standards and guidelines	Ongoing/In progress	Saratoga County OES reviews newly assigned address and provides feedback to municipalities when necessary.	Yes	Continue to review newly assigned address and provides feedback to municipalities when necessary.
Saratoga County	SC-18	Encourage municipalities to incorporate sound development principals when reviewing development proposals	Ongoing/In progress	Saratoga County OES reviews newly assigned address and provides feedback to municipalities when necessary.	Yes	Continue to review newly assigned address and provides feedback to municipalities when necessary.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Saratoga County	SC-19	Encourage towns and villages to adopt comprehensive plans and land use regulations to foster sound development principals	Ongoing/In progress	The municipalities already have a variety of existing regulations related to zoning and land use that foster sound development principals.	Yes	The County will continue to encourage municipalities to adopt regulations and related to zoning and land use in order to foster sound development principals.
Saratoga County	SC-20	Create and maintain a natural resources inventory for Saratoga County	Not started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The County will develop a natural resource inventory that can be shared online and maintained in the future.
Saratoga County	SC-21	Authorize the Saratoga County Planning Board to review subdivisions under NYS GML239	Ongoing/In progress	Subdivisions that meet the criteria of GML 239 are reviewed by the County Planning Board.	Yes	County Planning Board will continue to review subdivisions that meet the criteria of GML 239.
Saratoga County	SC-22	Undertake a countywide comprehensive plan that would gather input from individual municipalities and take into consideration existing local comprehensive plans and regulatory tools to implement sound development principals	Ongoing/In progress	Saratoga County has produced a Green Infrastructure Plan.	Yes	Continue to evaluate and revise Green Infrastructure Plan as needed moving forward
Saratoga County	SC-23	Work with existing agencies and organizations to develop open space strategies and conservation standards to be met by new development projects	Ongoing/In progress	Saratoga County works with municipalities as well as Saratoga PLAN on these initiatives. Some of this is handled through the Section 239 process. The County also manages the Saratoga County Farmland and Open Space Program which works to permanently protect (either through purchase or Conservation Easement) open space and farmland around the county. This program is very successful.	Yes	Continue the process as implemented and revise if necessary.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Saratoga County	SC-24	Conduct continued public and stakeholder outreach to promote awareness of this Plan and obtain ongoing public and stakeholder input. Specific activities shall include maintaining the public HMP website, media releases, maintaining copies of the plan in town halls, and may include public meetings.	Ongoing/In progress	The County publishes this plan openly on its website. When a draft of the plan update is finalized, it will be published for public review. Additionally, the plan will be circulated among the Local Emergency Planning Committee (LEPC) for comment.	Yes	County will continue to share its Hazard Mitigation Plan online and accept feedback. Revisions will be made on an ongoing as needed basis.
Town of Ballston	TB-1a	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Not started	FEMA Resiliency meeting attended 12/05/2018. Mitigation project priorities presented (TB-10). Coordinate and schedule meetings with State (DHSES, and DEC) to conduct Community Assessment (& other programs) as soon as possible to address the Hazards that the ToB LEMC has addressed and documented since 2014. Attain local credentialing for CRS.	Yes	Schedule visits by FEMA, DEC (Community Assessment) to provide information to the community with special attention to the mitigation priorities identified by the ToB LEMC. Identify areas of NFIP repetitive loss and LOMR changes. Better characterize current and future flood/stormwater hazard events by conducting additional hazard studies and identify inadequate stormwater infrastructure and poorly drained areas. Reach out to Saratoga County Office of Emergency Services to advance these initiatives as soon as possible (Early 2019).

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	Reevaluate if this is or is not economically viable in Ballston.	Yes	Start with an analysis of current building inventory in hazardous areas (i.e. built environment in floodplains, natural hazard areas) using available county-wide building footprints.
Town of Ballston	TB-2	Consider participation in incentive-based programs such as CRS.	Not started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department
Town of Ballston	TB-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The Town continues to implement this action with volunteer efforts, and contributions from water and highway department, building department.	Yes	Request and secure funding to 1.) create a "Mitigation Section" and add to Town of Ballston's updated Comprehensive Emergency Management Plan (CEMP). 2.) Reformat Town's Emergency Operations Plan (EOP) to comply with NIMS.
Town of Ballston	TB-4	Strive to maintain compliance with, and good- standing in the National Flood Insurance program.	Completed	NFIP -In Compliance. Local Law chapter 68 Designates the Zoning Officer as the local Enforcement official.	No	https://ecode360.com/6232200 Chapter 68: Flood Damage Prevention [HISTORY: Adopted by the Town Board of the Town of Ballston 5-2-1995 by L.L. No. 3-1995. Amendments noted where applicable.] Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-5	Continue to develop, enhance, and implement existing emergency plans.	Ongoing/In progress	The Town continues to update the EOP since the last HMP update. Town EOP was last updated in 2016. The final 2018 updates were pending at the time of the 2019 HMP update.	Yes	The Town will apply for funding needed to update and re-write the EOP with a more modern format in line with emergency management best practices.
Town of Ballston	TB-6	Create/enhance/ maintain mutual aid agreements with neighboring communities.	Ongoing/In progress	Shared Services with Town of Milton. Official Red Cross Shelter agreement. Mutual Aid through County Highway Association. Become familiar with ESF #? In County Comprehensive Emergency Management Plan - Transportation Annex.	Yes	Shared Services agreement with Town of Malta 08/15/2018
Town of Ballston	TB-7	Support County-wide initiatives identified in Section 9.1 of the County Annex.	Ongoing/In progress	ToB LEMC Establish organization (Committee) 2015 Established Priorities, updated written plans and protocols (2016) ToB LEMC continues establish collaborative relationships, Integrate & coordinate activities, and continues outreach. Participates in State Regional Emergency Management District meetings. ToB LEMC had completed All-hazard Assessment (THIRA / Abbreviated CEPA model) and preliminary risk analysis using best available data.	Yes	Town Emergency Operations Plan Updated 2016. ToB LEMC Chairman documenting updates and accomplishments for 2018.
Town of Ballston	TB-8	Increase supply in water tower. Currently there is only a two-day supply. Water is supplied by the Town of Glenville & Village of Ballston. Should there be a major fire there would be insufficient water to handle the fire.	Completed	Town has tied into the Saratoga County Water Authority supply from Northeast corner of town (Eastline, and Rt 67).	No	Overall water system pressure / Hydrant tests should be evaluated in specific segments, or areas of concern. Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-9	Obtain back-up power supply for the pump station that serves the water tower. Loss of power is mainly associated with major power outages from storms and severe weather	Completed	Back-up power supply for the pump station installed on Eastline Rd pumping Station. Procured with local funds. Generator Procured and installed -2017 -Town Funds -Grant application denied because County Mitigation, and Emergency Management plans were out of date, and out of compliance.	No	Backup Generator Procured for Eastline Road Water Pump with Local Funds 2017. Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
Town of Ballston	TB-10	Alleviate flooding along the Outlet Road which experiences frequent flooding: Outlet Road –Install steel shoring along south side of roadway for ¼-1/2 Mile.	Ongoing/In progress	High Priority Mitigation Project, identified, and re-written in the New DHSES Worksheet -12/05/2018. Presented in a formal multi agency FEMA Resiliency Workshop 12/05/2018, Malta, NY.	Yes	Updated as a new high priority project (See DHSES Worksheet)
Town of Ballston	TB-11	Establish a Farmland and Open Space Protection Program to achieve meaningful open space conservation even while growth and development occurs. Per Comprehensive Plan	Ongoing/In progress	Town is adopting new zoning (2019) which offers the option for PDR's and encourages Conservation Subdivisions. ToB LEMC, and Farmland Preservation and Protection Committee (FPPC) have established and Executive Steering Committee, to plan and jointly sponsor a Rural / Agricultural drill and expertise for 2019 with Public Safety Organizations, community stakeholders (Farming community), CART team.	Yes	Direct coordination for planning with Saratoga County OES will be needed in early 2019, to establish goals, and the venue for the exercise. Funding support will be needed to design and coordinate HSEEP compliant exercise.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-12	Encourage the protection of stream corridors throughout the community, and water quality in Ballston Lake (e.g., stream buffers on classified streams). Included as part of the Ballston Lake Overlay Plan	Ongoing/In progress	Riparian "best Practices" being adopted in New Zoning (pending adoption 2018, or early 2019). Workplans being developed between Building Department and ToB LEMC to coordinate and share GIS information system data to prioritize sensitive areas and assess impacts of proposed new projects within 100' riparian buffer corridors.	Yes	Yes; Need to collect Baseline data and inventory of currently existing conditions, for future change detection. Should be done in conjunction with Mitigation action #2 (2019 Worksheet Update) for flood map / drainage studies. Pilot drainage and funded floodplain risk analysis should be conducted FEMA Flood study information using Hazus and the existing GIS building footprints and ToB LEMC GIS database of critical facilities for loss estimation in flood zones to residential, commercial and public facilities.

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-13	Town should continue to work closely with the DEC and Saratoga County to establish a Stormwater management program and ensure compliance with US EPA Stormwater Phase II regulations.	Ongoing/In progress	MS4 Program currently administered and managed by planner in ToB Building Department. Future workplans have been discussed and outlined between Building Department and ToB LEMC to coordinate and share GIS information to enhance information management. MS4 (GIS) should be developed and shared for purposes beyond regulatory and enforcement purposes on a site-by-site basis and integrated into hazard assessments, and risk analysis on a watershed basis.	Yes	MS4 Program currently managed by planner in Building Department. Establish GIS and information management system, leveraging off of the ToB LEMC's Online GIS system to collect, assemble, and manage MS4 information and data. Increased collaboration efforts should be made to sharing information and data between departments, and committees at the local level, and shared at the County (i.e. Planning Department) and eventually shared with County OES, as they establish information management systems (i.e. GIS, modeling, Risk MAP, stage level monitoring during heavy runoff season, or severe storm events). Monitoring and assessment information should be shared with town highway, and water department, as well.
Town of Ballston	TB-14	Conduct a needs assessment for fire and emergency services.	Ongoing/In progress	TOB LEMC Establish organization (Committee) 2015 Established Priorities, updated written plans and protocols (2016) ToB LEMC continues establish collaborative relationships, Integrate & coordinate activities, and continues outreach. Participates in State Regional Emergency Management District meetings. ToB LEMC had completed All-hazard Assessment (THIRA / Abbreviated CEPA model) and preliminary risk analysis using best available data.	Yes	A formally funded capability assessment should be conducted town-wide, and regionally (adjoining Fire EMS Districts and Towns) with cooperation of Public Safety agencies and stakeholders.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-15	Continue to coordinate with neighboring municipalities, Saratoga County, the Saratoga Economic Development Corporation (SEDC), area school districts and emergency service providers, and regional entities such as the Capital District Transportation Committee (CDTC), the Capital District Transportation Authority (CDTA), and the Capital District Regional Planning Commission (CDRPC) in planning related activities. Currently have a Stormwater Mgmt. plan along with a County wide municipal agreement with the county.	Ongoing/In progress	Cooperation and inputs from public safety organizations, town government, citizens and stakeholders (i.e. BLIA) will be welcome to support these initiatives.	Yes	Change the State paradigm of unfunded mandates as increased burdens on local municipal governments rise (i.e. writing Emergency Operations Plans, Contributing to Hazard Mitigation Plans, Conducting Drills, HSEEP exercises); Town of Ballston LEMC should continue to be a leader to change the paradigm in New Your State to allow local governments to apply for and receive a portion of FEMA \$funding that filters through NYS (DHSES) grants and to the County. Continue to encourage volunteer efforts at the local level to accomplish this critical work, but understand, some ambitious goals are currently unsustainable without support, and funding. Continue to develop Mutual Aid /shared services agreements with adjoining communities, and neighboring municipal committees. (STATE IMAP).

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-16	Create/update the Emergency Action Plans for all dams located within the municipality.	Ongoing/In progress	Cooperation and inputs from public safety organizations, town government, citizens and stakeholders (i.e. BLIA) will be welcome to support these initiatives.	Yes	Apply for funding that will support project management and hired consultants to scale the advanced interfaces and information management systems that the ToB LEMC has established. Continue to advance the use cloud-based information systems for all phases of Emergency Management, beyond mitigation planning. Extend these systems through shared service agreements & software licensing agreements with County Planning Department, OES, and other local municipalities. Integrate these technologies with County systems (i.e. 911 CAD, Notification systems, (Code Red, I AM Responding).
Town of Ballston	TB-17	Implement dam structure repairs as required by dam safety report/protocols	Canceled	There are no regulated dam structures in the town, therefore no progress has been made on this action and it will be cancelled.	No	This action will be removed from the 2019 Mitigation Action Plan.
Town of Ballston	TB-18	Support the Installation/Implementation of Community Emergency Alert System	Ongoing/In progress	County level Responsibility - Code Red -Need Training / Testing. ToB has procured 4 Mobile Radios on compliant with County 800MHz Emergency Communications Plan. Initial testing completed during Town of Milton Emergency Evacuation, and Sheltering Drill, October 6, 2018.	Yes	System should be tested through joint exercises with local public safety organizations, and the County OES who is the system administrator, through \$funded training, exercises and drills held jointly with the "whole community", including GO, and Non-GO stakeholders, and the business community. Additional training required on 800 MHz (P25) County

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-19	Create a mitigation support fund to provide matching funds on an ongoing basis for municipality and residential mitigation projects which will fund cost-sharing portions of projects and be replenished during the annual budget cycle.	Ongoing/In progress	Town established Local Emergency Management Committee, 2015 to address local Emergency Management Plan, using all hazards, including mitigation and community resiliency. LEMC Received a nominal grant in 2016 (SALS Library system), and LEMC currently receives allocated funding from Local (Town) budget. Update to Emergency Management Plan, 2016 and annual updates and hazard assessment continual basis. Advanced GIS system developed for all hazards assessment, and operational response.	Yes	Seek shared FEMA DHS / NYS DHSES grant funding PDM, HMGP and, critical infrastructure grants directly, and request a portion of PDM, HMGP, and EMPG funds that the County OEM receives. Seek other funding like LGRMIF (State Education) to enhance information management systems, and GIS. Additional funding needed to assist with training committee members and department staff on ICS and the use of these cloud-based systems for continued hazards assessment, and operational response (i.e. at the Town's EOC - Municipal Center).-

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Ballston	TB-20	Recent road repairs in the vicinity of Benedict and Randall Roads resulted in the accumulation of one foot of water in the area. This was resolved but the Town would like to implement a study this situation to avoid future problems.	Ongoing/In progress	Concept and Objectives for FSE documented by ToB initial Steering Committee 2014. ToB LEMC established formal organization (Committee) 2015. Established Priorities updated written plans and protocols (2016). LEMC Participates in State Regional Emergency Management District meetings. ToB LEMC has completed All-hazard Assessment (THIRA / Abbreviated CEPA model) and preliminary risk analysis using best available data. ToB hosted TTX in October 2017. ToB LEMC Participated in Town of Milton Evacuation and Sheltering Exercise, October 2018. ToB LEMC Planning 2019 Rural Ag multi-Jurisdictional Exercises (See TB-11).	Yes	Host Full Scale, Fully Funded FEMA / DHSES HSEEP Exercise; (ESF 3, 5, & 10). Test the response capabilities, multi-agency coordination and interoperable communication through a Full-Scale Exercise (FSE) along the CP Rail Line in the Town of Ballston. Test the Geographic Response Plans created in response to NYS Executive Order 120 (2014) with appropriate oversight and cooperation of the county's emergency management officials and stakeholders in accordance with recommendations in EO125, OPA 90, The Clean Water Act, SARA Title III, CERCLA, The National Contingency Plan, NYS Navigation Law, NYS Executive Law Article 2B, and other statutory requirements. Exercises are a key component of national preparedness—they provide elected and appointed officials and stakeholders from across the whole community with the opportunity to shape planning, assess and validate capabilities, and address areas for improvement.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Village of Ballston Spa	VBS-1a	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Not started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of retrofitting the structures to mitigate risk, comparing the cost-effectiveness to relocation.
Village of Ballston Spa	VBS-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of relocation of the structures to mitigate risk, comparing the cost-effectiveness to retrofitting.
Village of Ballston Spa	VBS-2	Consider participation in incentive-based programs such as CRS.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Village of Ballston Spa	VBS-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
Village of Ballston Spa	VBS-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The jurisdiction continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program.	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.
Village of Ballston Spa	VBS-5	Continue to develop, enhance, and implement existing emergency plans.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The Village will identify and implement next steps to develop, enhance, implement and educate its community on the existing emergency management planning.
Village of Ballston Spa	VBS-6	Create/enhance/ maintain mutual aid agreements with neighboring communities.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The jurisdiction will identify opportunities to create new mutual aid agreements with neighboring communities. For existing agreements, the jurisdiction will evaluate the need to maintain these agreements and/or enhance them in the future.
Village of Ballston Spa	VBS-7	Support County-wide initiatives identified in Section 9.1 of the County Annex.	Ongoing/In progress	The municipality continues to partner with Saratoga OES to promote interoperability and continuity of operations.	Yes	The municipality will continue to identify opportunities to partner with Saratoga OES to promote and support interoperability and mitigation projects throughout the County.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Village of Ballston Spa	VBS-8	Create/update the Emergency Action Plans for all dams located within the municipality.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Village of Ballston Spa	VBS-9	Implement dam structure repairs as required by dam safety report/protocols	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Village of Ballston Spa	VBS-10	Support the Installation/Implementation of Community Emergency Alert System	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Village of Ballston Spa	VBS-11	Create a mitigation support fund to provide matching funds on an ongoing basis for municipality and residential mitigation projects which will fund cost-sharing portions of projects and be replenished during the annual budget cycle	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Village of Ballston Spa	VBS-12	Investigate and implement mitigation actions that would protect the St. Mary's School from the flood hazard. The school is located within the flood hazard area.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Village of Ballston Spa	VBS-13	Investigate and implement mitigation actions that would protect the Union Fire Department from the flood hazard. The Fire Department is located in the flood hazard area.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Charlton	TCH-1a	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of retrofitting the structures to mitigate risk, comparing the cost-effectiveness to relocation.
Town of Charlton	TCH-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of relocation of the structures to mitigate risk, comparing the cost-effectiveness to retrofitting.
Town of Charlton	TCH-2	Consider participation in incentive-based programs such as CRS.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Charlton	TCH-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
Town of Charlton	TCH-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The jurisdiction continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program.	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.
Town of Charlton	TCH-5	Continue to develop, enhance, and implement existing emergency plans.	Ongoing/In progress	This action has not been completed and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The Town will identify and implement next steps to develop, enhance, implement and educate its community on the existing emergency management planning.
Town of Charlton	TCH-6	Create/enhance/ maintain mutual aid agreements with neighboring communities.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The jurisdiction will identify opportunities to create new mutual aid agreements with neighboring communities. For existing agreements, the jurisdiction will evaluate the need to maintain these agreements and/or enhance them in the future.
Town of Charlton	TCH-7	Support County-wide initiatives identified in Section 9.1 of the County Annex.	Ongoing/In progress	The municipality continues to partner with Saratoga OES to promote interoperability and continuity of operations.	Yes	The municipality will continue to identify opportunities to partner with Saratoga OES to promote and support interoperability and mitigation projects throughout the County.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Charlton	TCH-8	Implement management in areas of power-lines to improve post-disaster debris management and prevent power failures during storms.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Town of Charlton	TCH-9	Develop and/or enhance the current stormwater management system to be in compliance with federal and state regulations such that there will be a net reduction in the flood risk caused by stormwater impacts.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Town of Charlton	TCH-10	Continue to engage in the in-house program that follows the MS4 Plan, along with culvert and ditch upgrading to enlarge the stormwater volume capacity and flow and decrease localized flooding in Town.	Ongoing/In progress	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Charlton	TCH-11	Retrofit the Town water system tank and piping so that they are constructed to seismic standards.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Town of Charlton	TCH-12	Assure storm water management programs comply with all local and NYS Department of Environmental Conservation (DEC) regulations.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Town of Charlton	TCH-13	Provide adequate training for town and other officials regarding stormwater and road management and use Best Management Practices.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Charlton	TCH-14	Create a detailed open space map using the existing GIS data so that the programs and policies of the Comprehensive Plan can be targeted to specific areas. This effort could also include the following steps: mapping of hazard areas to determine best places for development or preservation of land/dedicated to open space; a threat-of-loss analysis (to identify those existing areas most at threat of being lost as open space); mapping of significant resource areas, potential open spaces, parks, and greenways to connect these areas; and developing a system to rank these areas relevant to their importance as open spaces.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Charlton	TCH-15	Implement a study to determine the areas vulnerable to flooding, the location, the cause of flooding and possible actions to mitigate flood prone areas and critical utilities. Of particular interest is the entire Silver Beach Rd area, extending along Saratoga Lake. It is at the bottom of the Drummond Creek watershed, ripe with Federal and State jurisdictional wetlands, and floodplains. The roads, with the exception of Silver Beach, are entirely privately owned, and drainage infrastructure is nonexistent. Lake front property is prime for development and redevelopment, and the Town has seen an upswing in conversions from small seasonal camps, to large year round homes. It floods every spring, and after heavy storms. There is much concern about the effects of up-stream development.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Town of Charlton	TCH-16	To address beaver dam issues in Town, monitor vulnerable areas and commission a study to investigate ways to avoid future damages.	Canceled	No progress has been made on the implementation of this action because it references a project that is not located in the Town of Charlton, therefore it will be cancelled.	No	This action will be removed from the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Charlton	TCH-19	Create a mitigation support fund to provide matching funds on an ongoing basis for municipality and residential mitigation projects which will fund cost-sharing portions of projects and be replenished during the annual budget cycle.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan. The jurisdiction will first evaluate funding and technical capabilities needed for the action implementation and then acquire additional resources through grants and contractor support.
Town of Clifton Park	TCP-1a	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of retrofitting the structures to mitigate risk, comparing the cost-effectiveness to relocation.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Clifton Park	TCP-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of relocation of the structures to mitigate risk, comparing the cost-effectiveness to retrofitting.
Town of Clifton Park	TCP-2	Consider participation in incentive-based programs such as CRS.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department
Town of Clifton Park	TCP-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0.	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
Town of Clifton Park	TCP-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The jurisdiction continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program.	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Clifton Park	TCP-5	Continue to develop, enhance, and implement existing emergency plans.	Ongoing/In progress	The Town continues to develop, enhance, implement and educate its community on the existing emergency management planning.	Yes	The Town will continue to update and enhance the EOP to align with emergency management best practices and changing priorities within the Town.
Town of Clifton Park	TCP-6	Create/enhance/ maintain mutual aid agreements with neighboring communities as well as County and State organizations such as New York State Police and Saratoga County Sheriff's Department to improve police protection.	Ongoing/In progress	This action is ongoing as the town budgets for mutual aid agreements every year.	Yes	The town will continue to create new mutual aid agreements and maintain existing agreements.
Town of Clifton Park	TCP-7	Support County-wide initiatives identified in Section 9.1 of the County Annex.	Ongoing/In progress	The municipality continues to partner with Saratoga OES to promote interoperability and continuity of operations.	Yes	The municipality will continue to identify opportunities to partner with Saratoga OES to promote and support interoperability and mitigation projects throughout the County.
Town of Clifton Park	TCP-8	Create/update the Emergency Action Plans for all dams located within the municipality.	Ongoing/In progress	2 dams (at least) in town. One owned by Town of Colony. Other has not been inspected to date.	Yes	Budget for inspections as required by state law
Town of Clifton Park	TCP-9	Implement dam structure repairs as required by dam safety report/protocols	Ongoing/In progress	No repairs have been required to date. The town continues to monitor dam structures.	Yes	Dam structure repairs will continue to be made as needed per dam safety reports and protocols.
Town of Clifton Park	TCP-10	Support the Installation/Implementation of Community Emergency Alert System	Completed	Clifton Park has a voluntary reverse 911 service to notify residents of town wide emergencies.	No	This action has been completed and will be removed

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Clifton Park	TCP-11	Create a mitigation support fund to provide matching funds on an ongoing basis for municipality and residential mitigation projects which will fund cost-sharing portions of projects and be replenished during the annual budget cycle	Ongoing/In progress	The town has a Disaster Preparedness fund and an Engineering Services fund in the budget	Yes	The Town will continue to maintain disaster preparedness and Engineering services funds in the budget for this purpose.
Town of Clifton Park	TCP-12	Increase public education/public participation on hazards of concern	Ongoing/In progress	Information on many hazards is always available in pamphlet form in town hall.	Yes	The Town will continue to provide information about hazards of concern and will make changes and updates as hazards evolve.
Town of Clifton Park	TCP-13	To prevent stormwater handling capacity and water quality from being diminished by future development, implement sound construction practices to control erosion and sedimentation of waterways and maintain existing drainage features.	Ongoing/In progress	The Town continues to review all plans for new development for compliance with Town Code 86-7 (2) and ensure that this development does not adversely impact water quality or stormwater handling capacity.	Yes	The Town will continue to enforce Town code 86-7 (2) and will update the regulations as needed.
Town of Clifton Park	TCP-14	Develop a town-wide stormwater management plan and establish responsibility for the operation and maintenance of existing stormwater management areas.	Ongoing/In progress	Have hired Stormwater Management Technician and have established maintenance agreements for privately owned stormwater management facilities.	Yes	Town of Clifton Park Stormwater Management Plan with minimum control measures has been adopted and will continue to be used on all development.
Town of Clifton Park	TCP-15	Maintain and support all stormwater management goals, regulations and laws as promulgated by the New York State Department of Environmental Conservation and the Town of Clifton Park.	Ongoing/In progress	The Town generates the MS4 Annual Report in support of this action.	Yes	The Town will continue to receive technical support from the County Stormwater Management Agreement to ensure compliance with the NYS DEC's stormwater management regulations.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Clifton Park	TCP-16	To protect wetlands and stream corridors for their benefits to wildlife habitat, flood and stormwater control, groundwater protection, erosion control and recreation by expanding wetland mitigation options as fostered by the Environmental Conservation Commission and Army Corps of Engineers.	Ongoing/In progress	This action continues to be implemented through Town Code 208-69 Land Conservation Districts.	Yes	The Town will continue to protect wetlands and stream corridors through the implementation of Town Code 208-69 Land Conservation Districts.
Town of Clifton Park	TCP-17	Supporting proper development practices within flood-prone areas as indicated in the Town's floodplain management regulations in order to protect wetlands and stream corridors for their benefits to wildlife habitat, flood and stormwater control, groundwater protection, erosion control and recreation	Ongoing/In progress	The town regularly supports proper development practices in flood-prone areas by reviewing stormwater plans for all new development.	Yes	The town will continue to support proper development practices in flood-prone areas by reviewing stormwater plans for all new development.
Town of Clifton Park	TCP-18	Integrate more comprehensive oversight in the planning, construction and post- construction to ensure sound construction practices are used to control erosion and sedimentation of waterways and minimize drainage and flooding issues with future development.	Ongoing/In progress	Have stormwater management Practice Agreement.	Yes	Stormwater management tech., town designated engineer, and SMO review all new plans.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Clifton Park	TCP-19	The Town of Clifton Park sewer department has a trailer generator and truck mounted generator that allows for mobile power to be provided during a disruption in a facility without a generator. However, these efforts are difficult during mass outages like the Storm of 2008. The Town would like to purchase back-up generators for all stations by 2024. •Riverview Landings / Old Nott Farm (WWTP)•Riverview Landing / Old Nott Farm (Pump Station)•Wildflower Way Ct. (Pump Station)•Broadleaf Dr. (Pump Station)•Green Meadow Dr. (Pump Station)•Knollwood Drive (Pump station)•Maple Ridge Lane (Pump Station)•Denkers Drive (Pump Station)•Gretel Terrace (Pump Station)	Ongoing/In progress	The Town has purchased generators for all but three pump stations.	Yes	The Town will secure funding for the purchase and installation of generators for the three remaining pump stations.
Town of Clifton Park	TCP-20	Investigate and implement mitigation actions that would protect the Arongen Elementary School from the flood hazard. Based on the estimated flood modeling results from this Plan, the school may experience damages as a result of a 100- and/or 500-year flood event.	Completed	A new culvert was installed after a flooding event.	No	Culvert and bridge replaced by school district after a flooding event. Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Clifton Park	TCP-21	Discuss and support mitigation actions that would protect the NYS Power Authority (electric facility) from the flood hazard. The facility is located within the flood hazard area.	Canceled	This is a state owned and operated facility and the town has no jurisdiction and no progress has been made on this action, therefore it will be cancelled.	No	This action will be removed from the 2019 Mitigation Action Plan.
Town of Clifton Park	TCP-22	Culvert upgrade and clearing at Kinns Road	Completed	Completed upgrade to culvert crossing in 2018	No	The County just finished refurbishing the culvert at Kinns Road by Plank Rd Intersection with concrete wing walls and cleared the 90% blockage. (There are still the culverts located east of Nadler Rd / Kinns Rd Intersection and the Town owned culvert under Plank Rd just south of the Kinns Rd intersection that needs to be improved .)
Town of Corinth	TCR-1a	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of retrofitting the structures to mitigate risk, comparing the cost-effectiveness to relocation.

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Hadley	TH-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of relocation of the structures to mitigate risk, comparing the cost-effectiveness to retrofitting.
Town of Hadley	TH-2	Consider participation in incentive-based programs such as CRS.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department
Town of Hadley	TH-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
Town of Hadley	TH-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The jurisdiction continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program.	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Milton	TMI-1a	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of retrofitting the structures to mitigate risk, comparing the cost-effectiveness to relocation.
Town of Milton	TMI-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of relocation of the structures to mitigate risk, comparing the cost-effectiveness to retrofitting.
Town of Milton	TMI-2	Consider participation in incentive-based programs such as CRS.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Milton	TMI-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
Town of Milton	TMI-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The jurisdiction continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program.	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.
Town of Milton	TMI-5	Continue to develop, enhance, and implement existing emergency plans.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The Town will identify and implement next steps to develop, enhance, implement and educate its community on the existing emergency management planning.

Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not started	Loss history does not support this mitigation effort at the present time, therefore it will be cancelled.	No	This action will be removed from the 2019 Mitigation Action Plan.
City of Saratoga Springs	CSS-2	Consider participation in incentive-based programs such as CRS.	Not started	This action has not been completed and has been determined to not be critical to the hazard mitigation program of this jurisdiction, therefore it will not be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
City of Saratoga Springs	CSS-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
City of Saratoga Springs	CSS-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	City continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.
City of Saratoga Springs	CSS-5	Continue to develop, enhance, and implement existing emergency plans.	Ongoing/In progress	City continues to develop, enhance, implement and educate its community on the existing emergency management planning.	Yes	The City will continue to update and enhance the EOP to align with emergency management best practices and changing priorities within the City.
City of Saratoga Springs	CSS-6	Create/enhance/ maintain mutual aid agreements with neighboring communities for continuity of operations.	Ongoing/In progress	City continues to partner with Saratoga OES to promote interoperability and continuity of operations.	Yes	The jurisdiction will identify opportunities to create new mutual aid agreements with neighboring communities. For existing agreements, the jurisdiction will evaluate the need to maintain these agreements and/or enhance them in the future.
City of Saratoga Springs	CSS-7	Support County-wide initiatives identified in Section 9.1 of the County Annex.	Ongoing/In progress	City continues to partner with Saratoga OES to promote interoperability and continuity of operations.	Yes	The municipality will continue to identify opportunities to partner with Saratoga OES to promote and support interoperability and mitigation projects throughout the County.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
City of Saratoga Springs	CSS-8	Upgrade and increase the capacity of the current Stormwater collection system such that there will be a net reduction in the flood risk caused by Stormwater impacts	Ongoing/In progress	City continues to update and increase the City's MS4 Stormwater Management System and its Planning in accordance with NYS DEC and the EPA.	Yes	City mandates developers and permit applicants to reduce stormwater flow as part of its regulatory efforts. SWIP is part of the Building and Planning Departments approval process in support of the MS4 Stormwater Management System.
City of Saratoga Springs	CSS-9	Establish and maintain Stormwater maintenance program.	Completed	City has an approved MS4 Stormwater Management Program that is ongoing in its education and compliance initiatives	No	The City will continue to implement its MS4 Stormwater Management Program, identifying opportunities for education and compliance. This action will be removed from the mitigation action plan because it is completed.
City of Saratoga Springs	CSS-10	Move power, telephone and cable utility wiring underground for critical City infrastructure.	Not started	This is a cost prohibitive issue within the City given the topography of the region and the complexity of the current infrastructure. It is not supported by the power and telephone utilities. Underground cable installation is set to occur comprehensively throughout the City in the future.	Yes	Lead support agency for new cable internet will be SiFi Networks within City limits on a move forward basis per the contractual agreement signed with the City.
City of Saratoga Springs	CSS-11	Enhance interoperability communications between fire, police, EMS, DPW and emergency management.	Ongoing/In progress	City has expended capital funds for a new radio tower and new dispatch center that is redundant to Saratoga OES services and increases the interoperability between all agencies.	Yes	Project scheduled for completion by January 1, 2019 but efforts will continue to enhance interoperability between all agencies.
City of Saratoga Springs	CSS-12	Purchase generator for the water treatment plant to allow City to continue to provide potable water to City and surrounding community.	Completed	Generator in place and tested regularly for operational efficiency.	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
City of Saratoga Springs	CSS-13	Continue to implement the MIS Hazardous Waste Mitigation Program per federal and state regulatory agency mandates.	Ongoing/In progress	Hazardous Waste Mitigation efforts are ongoing in coordination with County DPW, but annual community wide effort occurs with NYS funding to facilitate compliance	Yes	The City will continue to implement Hazardous Waste Mitigation programs and identify opportunities to use NYS funding to facilitate compliance.
City of Saratoga Springs	CSS-14	Identify storm water system rehabilitation needs and areas for new storm system development including culvert replacements and enhanced drainage systems. City has identified area surrounding Saratoga Harness and Flat Tracks and area of North Broadway as High Risk Storm Water Disaster Areas due to topography and geology of these sites within City.	Ongoing/In progress	City continues to manage and facilitate MS4 Stormwater Management Programming for the public and private sector	Yes	City hires consulting engineers on an ongoing basis to rehabilitate the City's current stormwater systems in problematic areas the most recent being the rehabilitation of Gilbert Road. City has designated engineers on staff to assist as needed and goes out to bid depending upon the complexity and the overall anticipated cost of the system in question.
City of Saratoga Springs	CSS-15	Participate in the County's ongoing GIS initiative. Currently, the City is examining and mapping all new and existing electrical, sanitary sewer, water and traffic conduits with GPS Coordinate Systems.	Ongoing/In progress	City is currently participating with the Capital District Transportation Committee to GIS ADA compliance programming for public and private infrastructure in addition to utility and transportation initiatives.	Yes	Identify grants as funding sources to continue to implement this action.
City of Saratoga Springs	CSS-16	Support/enhance Building and/or Flood code enforcement programs at the local level public education and awareness of current codes. City has developed and is in the process of expanding public awareness programs via written and electronic means.	Ongoing/In progress	City continues to manage and facilitate educational programming for Building Code Compliance.	Yes	Identify grants as funding sources to continue to implement this action.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
City of Saratoga Springs	CSS-17	Vegetation Management: Trim trees and vegetation in the City rights-of-way to mitigate potential power loss in storm management	Ongoing/In progress	City has a Tree Management Program and partners with community organizations to promote healthy tree mitigation efforts.	Yes	Identify grants as funding sources to continue to implement this action.
City of Saratoga Springs	CSS-18	Create/update the Emergency Action Plans for all dams located within the municipality.	Completed	Emergency Action Plan completed and approved by City Council in 2016. Education is ongoing.	No	Continue to monitor and manage emergency action plan updates as necessary. This action will be removed from the mitigation action plan because it is completed.
City of Saratoga Springs	CSS-19	Implement dam structure repairs as required by dam safety report/protocols	Ongoing/In progress	City has budgeted capital monies for engineering and permits working with the NYS DEC and NYS DOT. Hazard Class of Loughberry Lake Dam has increased from B to C	Yes	Identify grants as funding sources to continue to implement this action.
City of Saratoga Springs	CSS-20	Support the Installation/Implementation of Community Emergency Alert System	Ongoing/In progress	Continually education and enrollment in community emergency notification system via Nixle and Reverse 911	Yes	City is part of the new Saratoga County Community Emergency Alert System. City has recently updated the Special Needs Database confirming those in need and deleting deceased community members. IT will continue to update the list on an annual basis. City supports and continues provide communication and education on enrollment in NIXEL and Reverse 911 as part of the Saratoga County OES Programming.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
City of Saratoga Springs	CSS-21	Create a mitigation support fund to provide matching funds on an ongoing basis for municipality and residential mitigation projects which will fund cost-sharing portions of projects and be replenished during the annual budget cycle	Not started	This project requires the support of federal agencies for funding which is negligible and unfeasible at this time. Replenishment at a local, state and federal level is negligible.	No	This action will be removed from the 2019 Mitigation Action Plan.
Village of Schuylerville	VSC-1a	Where appropriate, support retrofitting of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for retrofitting based on cost-effectiveness versus relocation. Where retrofitting is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of retrofitting the structures to mitigate risk, comparing the cost-effectiveness to relocation.
Village of Schuylerville	VSC-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of relocation of the structures to mitigate risk, comparing the cost-effectiveness to retrofitting.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Village of Schuylerville	VSC-2	Consider participation in incentive-based programs such as CRS.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department
Village of Schuylerville	VSC-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
Village of Schuylerville	VSC-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The jurisdiction continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program.	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.
Village of Schuylerville	VSC-5	Continue to develop, enhance, and implement existing emergency plans.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The Village will identify and implement next steps to develop, enhance, implement and educate its community on the existing emergency management planning.
Village of Schuylerville	VSC-6	Create/enhance/ maintain mutual aid agreements with neighboring communities.	Not Started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	The jurisdiction will identify opportunities to create new mutual aid agreements with neighboring communities. For existing agreements, the jurisdiction will evaluate the need to maintain these agreements and/or enhance them in the future.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Stillwater	TST-19	Form a committee and study the chronic flooding problem of ice jams on the Hudson River in the vicinity of the lower dam (lock C-3) and make recommendations on how to alleviate this problem. This Committee should involve the Town and Village of Stillwater, the City of Mechanicville, the New York State Canal Corporation, New York State Electric and Gas, Stillwater Power, the Saratoga County Emergency Management Office and any other agencies and organizations with a stake in this issue. (Per FMA)	Not Started	This municipality did not participate in the 2019 Hazard Mitigation Plan Update; therefore, a description of implementation was not captured for this action. If the municipality participates in the future, this description and the project status will be updated to reflect progress to date.	Yes	This municipality did not participate in the 2019 Hazard Mitigation Plan Update, therefore this action was not reviewed or evaluated for next steps and changes. This action will be carried forward into the 2019 plan for the municipality to evaluate during future planning processes.
Town of Stillwater	TST-20	Increase public education on flooding. Town and Village can hold a joint workshop on the causes of flooding, the availability of flood insurance and specific techniques for flood proofing property. This workshop could also focus on the value and function of wetlands as a whole, and specifically, their role in mitigating flooding. Further, the Town may wish to consider developing an educational brochure on flooding and its mitigation. Alternatively, such a topic could be incorporated within a Town newsletter. (Per FMA)	Not Started	This municipality did not participate in the 2019 Hazard Mitigation Plan Update; therefore, a description of implementation was not captured for this action. If the municipality participates in the future, this description and the project status will be updated to reflect progress to date.	Yes	This municipality did not participate in the 2019 Hazard Mitigation Plan Update, therefore this action was not reviewed or evaluated for next steps and changes. This action will be carried forward into the 2019 plan for the municipality to evaluate during future planning processes.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Stillwater	TST-21	Amend the Town zoning ordinance and Village site development law to: a) require stormwater analysis and mitigation for development and land clearing of a certain size, and b) to require erosion and sediment control. The latter has already been proposed in the draft update to the Town's zoning ordinance. (Per FMA)	Not Started	This municipality did not participate in the 2019 Hazard Mitigation Plan Update; therefore, a description of implementation was not captured for this action. If the municipality participates in the future, this description and the project status will be updated to reflect progress to date.	Yes	This municipality did not participate in the 2019 Hazard Mitigation Plan Update, therefore this action was not reviewed or evaluated for next steps and changes. This action will be carried forward into the 2019 plan for the municipality to evaluate during future planning processes.
Town of Stillwater	TST-22	Undertake a feasibility study to examine the possibility of establishing a trail or linear park along the Old Champlain Canal. (Per FMA)	Not Started	This municipality did not participate in the 2019 Hazard Mitigation Plan Update; therefore, a description of implementation was not captured for this action. If the municipality participates in the future, this description and the project status will be updated to reflect progress to date.	Yes	This municipality did not participate in the 2019 Hazard Mitigation Plan Update, therefore this action was not reviewed or evaluated for next steps and changes. This action will be carried forward into the 2019 plan for the municipality to evaluate during future planning processes.
Town of Stillwater	TST-23	Incorporate engineering and maintenance items related to flood prevention and mitigation in capital improvements and budget planning. (Per FMA)	Not Started	This municipality did not participate in the 2019 Hazard Mitigation Plan Update; therefore, a description of implementation was not captured for this action. If the municipality participates in the future, this description and the project status will be updated to reflect progress to date.	Yes	This municipality did not participate in the 2019 Hazard Mitigation Plan Update, therefore this action was not reviewed or evaluated for next steps and changes. This action will be carried forward into the 2019 plan for the municipality to evaluate during future planning processes.
Town of Stillwater	TST-24	Charge the Stillwater Grants Committee with the task of securing funding to implement the recommendations of the FMA. (Per FMA)	Not Started	This municipality did not participate in the 2019 Hazard Mitigation Plan Update; therefore, a description of implementation was not captured for this action. If the municipality participates in the future, this description and the project status will be updated to reflect progress to date.	Yes	This municipality did not participate in the 2019 Hazard Mitigation Plan Update, therefore this action was not reviewed or evaluated for next steps and changes. This action will be carried forward into the 2019 plan for the municipality to evaluate during future planning processes.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Wilton	TW-1b	Where appropriate, support purchase, or relocation of structures located in hazard-prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. Identify facilities that are viable candidates for relocation based on cost-effectiveness versus retrofitting. Where relocation is determined to be a viable option, consider implementation of that action based on available funding.	Not started	This action has not been completed and has been determined to not be critical to the hazard mitigation program of this jurisdiction, therefore it will not be carried forward into the 2019 Mitigation Action Plan.	No	Consult the 2019 HMP Risk Assessment to identify properties located in hazard-prone areas. Conduct additional analysis to identify additional properties not addressed in the HMP. Evaluate these properties for viability of relocation of the structures to mitigate risk, comparing the cost-effectiveness to retrofitting.
Town of Wilton	TW-2	Consider participation in incentive-based programs such as CRS.	Not started	This action has not been started and is still critical to the hazard mitigation program of this jurisdiction, therefore it will be carried forward into the 2019 Mitigation Action Plan.	Yes	Assign responsibility to a local Floodplain (NFIP) administrator from Building / Planning Department
Town of Wilton	TW-3	Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0	Ongoing/In progress	The jurisdiction participated in the previous HMP update and continues to observe the plan maintenance requirements described in Section 7, to monitor the implementation of the jurisdiction's mitigation actions and report progress to the County for this 2019 HMP update.	Yes	The jurisdiction will continue to support the implementation, monitoring, maintenance, and updating of this plan, as defined in Section 7.0, by monitoring action progress and attending annual Mitigation Planning Team meetings to review and report on the status of mitigation actions.
Town of Wilton	TW-4	Strive to maintain compliance with, and good-standing in the National Flood Insurance program.	Ongoing/In progress	The jurisdiction continues to promote education and enforce regulatory guidelines for the National Flood Insurance Program.	Yes	The jurisdiction's floodplain administrator will support the update and adoption of new flood insurance rate maps and review applications for new development in the floodplain to comply with the NFIP program.

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Wilton	TW-5	Continue to develop, enhance, and implement existing emergency plans.	Ongoing/In progress	The Town continues to develop, enhance, implement and educate its community on the existing emergency management planning.	Yes	The Town will continue to update and enhance the EOP to align with emergency management best practices and changing priorities within the Town.
Town of Wilton	TW-6	Create/enhance/ maintain mutual aid agreements with neighboring communities.	Ongoing/In progress	This action is ongoing as the town budgets for mutual aid agreements every year.	Yes	The jurisdiction will identify opportunities to create new mutual aid agreements with neighboring communities. For existing agreements, the jurisdiction will evaluate the need to maintain these agreements and/or enhance them in the future.
Town of Wilton	TW-7	Support County-wide initiatives identified in Section 9.1 of the County Annex.	Ongoing/In progress	The municipality continues to partner with Saratoga OES to promote interoperability and continuity of operations.	Yes	The municipality will continue to identify opportunities to partner with Saratoga OES to promote and support interoperability and mitigation projects throughout the County.
Town of Wilton	TW-8	Construct an inventory of community resources.	Ongoing/In progress	Town officials continue to collaborate to complete a comprehensive list of resources within the town.	Yes	Town officials continue to collaborate to complete a comprehensive list of resources within the town. The emergency manager will keep the inventory updated as new resources are obtained
Town of Wilton	TW-9	Provide ICS training for key Town employees	Ongoing/In progress	The Town continues to provide ongoing ICS training as needed and as required.	Yes	Collaborate with County OES to provide/schedule training for key employees identified.
Town of Wilton	TW-10	Establish the Town of Wilton GIS system to map natural and man-made hazard locations.	Ongoing/In progress	The town successfully mapped hazards while completing the Emergency Traffic Plan.	Yes	The Town will continue these efforts and work with County GIS to establish additional plans.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York
July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Wilton	TW-11	Establish an Emergency Response Resource Committee to outline responses to natural and name-made incidents.	Completed	The Town established an Emergency Response Resource Committee.	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-12	Implement a public outreach effort to distribute hazard information prior to an event.	Completed	The Town distributes hazard information prior to events.	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-13	Identify critical facilities in the Town that need to obtain back-up electrical power.	Completed	The Town has identified the critical facilities that require back-up electrical power and should be prioritized for repair and return to service.	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-14	Identify community shelters and purchase supplies of cots and blankets.	Ongoing/In progress	Community shelters have been identified.	Yes	The town still needs to purchase supplies, including cots and blankets, for the shelters. The town will identify and apply for funding to purchase these shelter supplies.
Town of Wilton	TW-15	Maintain and update the Town's Emergency Response Plan	Ongoing/In progress	The town has made routine updates to the Emergency Response Plan.	Yes	The town will continue to routinely update the plan in the future.
Town of Wilton	TW-16	Develop a post-disaster action plan for natural hazard events that will address the continuity of local government operations.	Not Started	Additional facilities have been identified a formalized continuity of operations does not exist currently	Yes	Collaborate with County OES and NYS DHSES to assist with training and implementation of a COOP plan
Town of Wilton	TW-17	Replace/upgrade culvert on C.P.R.R. located upstream of Deegan Road to mitigate flooding	Not started	Determined to be property not under control of the town	No	This action will be removed from the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Wilton	TW-18	U.S. Route 9 at Snook Kill has been identified as a location of frequent flooding. Investigate and identify the appropriate mitigation action and implement.	Completed	The Town has investigated this location for flooding and is pursuing mitigation action to mitigate the risks.	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-19	Preserve stream corridors and associated wetlands to maintain and improve water quality and habitat and to preserve natural buffers between incompatible land uses through the continued implementation and update as necessary of the Timber, Soil and Stream Regulations. Consideration should be given to the quality of the stream corridor, steepness of slopes, erodibility, habitat, and other factors to determine appropriate setbacks. Other streams may warrant such protection to preserve existing quality or to re- establish lost functions and values.	Completed	The Town continues to preserve stream corridors and wetlands.	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-20	Prepare an open space, recreation and pathways plan that protects farmlands, important natural resources/features including stream corridors and floodways, recreational resources (including trails), and scenic areas.	Completed	The Town created and maintains an open space plan (April 2007).	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.

Multi-Jurisdictional Hazard Mitigation Plan

Saratoga County, New York

July 18, 2019

Jurisdiction	Initiative	Action	Project Status	Description of Implementation	Include in 2019 Update?	Next Steps and/or Required Changes
Town of Wilton	TW-21	Increase local coordination with agencies responsible for the protection of natural resources, including the NYS Department of Environmental Conservation, the U.S. Army Corps of Engineers, and the U.S. Fish and Wildlife Service.	Ongoing/In progress	The town had found opportunities to increase local coordination through regular communication and meetings.	Yes	As opportunities arise the town is coordinating with these agencies to foster relationships and increase coordination in the future.
Town of Wilton	TW-22	Create/update the Emergency Action Plans for all dams located within the municipality.	Not started	No dams exist other than wildlife created; this is addressed in TW-21	No	This action will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-23	Implement dam structure repairs as required by dam safety report/protocols	Not started	Property determined to be privately owned	No	This action will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-24	Support the Installation/Implementation of Community Emergency Alert System	Completed	Town employees trained on County CodeRed System	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-25	Create a mitigation support fund to provide matching funds on an ongoing basis for municipality and residential mitigation projects which will fund cost-sharing portions of projects and be replenished during the annual budget cycle	Not started	This action has not been completed and has been determined to not be critical to the hazard mitigation program of this jurisdiction, therefore it will not be carried forward into the 2019 Mitigation Action Plan.	No	This action will be removed from the 2019 Mitigation Action Plan.
Town of Wilton	TW-26	Gather more information on the elevated groundwater occurring in Town and investigate possible actions to mitigate it.	Completed	The Town collects information on the elevated groundwater and uses it to develop actions to mitigate risk. For example, the Town's building applications require a Certification of Seasonal High Groundwater Elevation by a licensed professional.	No	Project is complete; therefore, it will be removed from the 2019 Mitigation Action Plan.
